

# Bring on the Shade with Pre-Season Awning Specials!

King Canopy's awnings offer a wide variety of fabric and color choices to complement your back yard décor. All of our awnings feature a protective shield that provides a safeguard from harmful UV rays, dust, birds and rain - all while providing shade and relief from the summer heat. All aluminum frame and heavy duty polyester fabric provide the strength and durability needed to stand up to the elements. The frame is designed with easy angle adjustments so that you can create the perfect shade environment over your back yard deck or patio.

All King Canopy awnings are easy to install with wall mount brackets which require little clearance for mounting, and each awning cover is teflon-coated to repel wind and debris.

Available either as a motorized retractable unit, or economical manual awning with hand crank. Please order by item number and color reference as detailed below. Shipping is not included and will be paid by the customer.
